Building teams: A Rocket Science or Not?

24.05.2016, 17:00 – 21:00 Uhr

Team success might be secured by creating a well-balanced team. In this workshop, we will learn how NASA builds their teams and balance the personalities in each team. We will also try to understand the personality types as NASA defined and use to create balance teams.

Fahri Akdemir

Fahri Akdemir is a PM Soft Skills Trainer and the project manager of IPMA Coaching for Development. His professional and academic work are dedicated to his main curiosity: behavioural competences of the human in the project environment. He holds a BSc Degree in Systems Engineering and MSc Degree in Strategic Project Management. So far he has designed and facilitated workshops in 16 different countries. Now he is working on his Ph.D. research focused on leadership in dance projects as part of Cross-Cultural Complex Project Management Program in Germany. He is a member of German Project Management Association (GPM), honorary member of Project Management Association of Nepal (PMAN), and project excellence award assessor of IPMA PE Awards.
